

ORDER FORM

Please supply us with a tracing of your foot, following the example to the right. This draft must be done by someone other than yourself with a pen or a pencil held straight up and down with whatever you are going to wear when you wear the shoe, (ie socks or tights). Do not cut this out.

On the ORIGINAL Drawing of your foot, please measure from the tip of the toe to the heel.

This should be the longest measurement.

Then measure across the widest part of the foot. This is usually the bunion area or the area just behind the big toe.

If there is anything else you feel you should mention about your feet, please do.

We can only do our best with your measurements so please make them very accurate.

If you have worn our shoes before please let us know of the style and the size.
